

Kevin

- Responsible for the backend configuration of Shop and Drink table
- Responsible for UI/front end for customer purchases. More specifically, the UI for when the customer purchases a drink.

Keya

- Responsible for the inventory change within the front and back end.
- Responsible for the inventory and transaction tables
- Responsible for the UI for inventory updates on the company/customer side

Natalie

- Responsible for the Sells table and Accounts table
- Responsible for initial UI and securely storing customer/company login information. Their logins will be stored as unique data keys in order to make sure that all information is independent.
- Responsible for secure customer/company logout to ensure that profiles will only be open for the purpose of inventory or transaction.
